DETAILED ACTION

Claims 1-96 are pending in the instant application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-84, drawn to compositions and methods comprising a drug-carrier complex, classified in class 514, subclass 1.
- II. Claims 85-90, drawn to a drug delivery system comprising a matrix and a nucleotide, classified in class 424, subclass 1.25.
- III. Claims 91-96, drawn to an implant comprising a matrix and a nucleotide, classified in class 424, subclass 1.33.

Applicants should note that Group I is drawn to several inventions, and Applicant should select from one of the following inventions within Group I:

Pick one drug selected from the group comprising a nucleic acid, a protein, a chemical such as an intercalator or a metal, a diagnostic such as a radioactive, paramagnetic, etc. **AND**

Pick one carrier selected from the group comprising a single stranded nucleotide, a double stranded nucleotide **AND**

Pick one polymer selected from the group consisting of a polysaccharide, a polyacetal or a polyether, **OR PICK ONE SPECIFIC COMBINATION** of two polymers, **OR** pick one oligomer selected from the group consisting of an oligosaccharide or an oligopeptide, **OR PICK ONE SPECIFIC COMBINATION** of two oligomers. The claims in each Group will be

Art Unit: 1635

examined according to the limitations of the elected invention since some claims were found to be generic to patentably distinct groups.

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are chemically, biologically, structurally and functionally distinct from each other and thus one does not render the other obvious. The drug carrier complexes of Group I are not required to produce each other, nor are they required to produce the matrices of Group II, nor the implants of Group III. Therefore, the inventions of the these three groups are capable of supporting separate patents.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Certain papers related to this application may be submitted to Art Unit 1635 by facsimile transmission. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. § 1.6(d)). The official fax telephone numbers for the Group are (703) 308-4242 and (703) 305-3014. NOTE: If Applicant *does* submit a paper by fax, the original signed copy should be retained by applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Jane Zara** whose telephone number is **(703) 306-5820**. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John LeGuyader, can be reached on (703) 308-0447. Any inquiry regarding this application should be directed to the patent analyst, Katrina Turner, whose telephone number is (703) 305-3413. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
